

AGENCY DISCLOSURE STATEMENT

The real estate agent who is providing you with this form is required to do so by Ohio law. You will not be bound to pay the agent or the agent's brokerage by merely signing this form. Instead, the purpose of this form is to confirm that you have been advised of the role of the agent(s) in the transaction proposed below. (For purposes of this form, the term "seller" includes a landlord and the term "buyer" includes a tenant.)

Property Address: 3800 East 55th Street, Cleveland, OH 44105

Buyer(s): Candice Ruffin

Seller(s): YAM CAPITAL P1 LLC

I. TRANSACTION INVOLVING TWO AGENTS IN TWO DIFFERENT BROKERAGES

The buyer will be represented by Tamika Little and BHR & Associates
AGENT(S) BROKERAGE

The seller will be represented by Christopher C. Kaylor, and Realty Trust Services, LLC
AGENT(S) BROKERAGE

II. TRANSACTION INVOLVING TWO AGENTS IN THE SAME BROKERAGE

If two agents in the real estate brokerage represent both the buyer and the seller, check the following relationship that will apply:

Agent(s) work(s) for the buyer and Agent(s) work(s) for the seller. Unless personally involved in the transaction, the principal broker and managers will be "dual agents," which is further explained on the back of this form. As dual agents they will maintain a neutral position in the transaction and they will protect all parties' confidential information.

Every agent in the brokerage represents every "client" of the brokerage. Therefore, agents and will be working for both the buyer and seller as "dual agents." Dual agency is explained on the back of this form. As dual agents they will maintain a neutral position in the transaction and they will protect all parties' confidential information. Unless indicated below, neither the agent(s) nor the brokerage acting as a dual agent in this transaction has a personal, family or business relationship with either the buyer or seller. *If such a relationship does exist, explain:*

III. TRANSACTION INVOLVING ONLY ONE REAL ESTATE AGENT

Agent(s) and real estate brokerage will

be "dual agents" representing both parties in this transaction in a neutral capacity. Dual agency is further explained on the back of this form. As dual agents they will maintain a neutral position in the transaction and they will protect all parties' confidential information. Unless indicated below, neither the agent(s) nor the brokerage acting as a dual agent in this transaction has a personal, family or business relationship with either the buyer or seller. *If such a relationship does exist, explain:*

represent only the (check one) seller or buyer in this transaction as a client. The other party is not represented and agrees to represent his/her own best interest. Any information provided the agent may be disclosed to the agent's client.

CONSENT

I (we) consent to the above relationships as we enter into this real estate transaction. If there is a dual agency in this transaction, I (we) acknowledge reading the information regarding dual agency explained on the back of this form.

SELLER/LANDLORD DATE

DUAL AGENCY

Ohio law permits a real estate agent and brokerage to represent both the seller and buyer in a real estate transaction as long as this is disclosed to both parties and they both agree. This is known as dual agency. As a dual agent, a real estate agent and brokerage represent two clients whose interests are, or at times could be, different or adverse. For this reason, the dual agent(s) may not be able to advocate on behalf of the client to the same extent the agent may have if the agent represented only one client.

As a dual agent, the agent(s) and brokerage shall:

- Treat both clients honestly;
- Disclose latent (not readily observable) material defects to the purchaser, if known by the agent(s) or brokerage;
- Provide information regarding lenders, inspectors and other professionals, if requested;
- Provide market information available from a property listing service or public records, if requested;
- Prepare and present all offers and counteroffers at the direction of the parties;
- Assist both parties in completing the steps necessary to fulfill the terms of any contract, if requested.

As a dual agent, the agent(s) and brokerage shall not:

- Disclose information that is confidential, or that would have an adverse effect on one party's position in the transaction, unless such disclosure is authorized by the client or required by law;
- Advocate or negotiate on behalf of either the buyer or seller;
- Suggest or recommend specific terms, including price, or disclose the terms or price a buyer is willing to offer or that a seller is willing to accept;
- Engage in conduct that is contrary to the instructions of either party and may not act in a biased manner on behalf of one party.

Compensation: Unless agreed otherwise, the brokerage will be compensated per the agency agreement.

Management Level Licensees: Generally, the principal broker and managers in a brokerage also represent the interests of any buyer or seller represented by an agent affiliated with that brokerage. Therefore, if both buyer and seller are represented by agents in the same brokerage, the principal broker and manager are dual agents. There are two exceptions to this. The first is where the principal broker or manager is personally representing one of the parties. The second is where the principal broker or manager is selling or buying his own real estate. These exceptions only apply if there is another principal broker or manager to supervise the other agent involved in the transaction.

Responsibilities of the Parties: The duties of the agent and brokerage in a real estate transaction do not relieve the buyer and seller from the responsibility to protect their own interests. The buyer and seller are advised to carefully read all agreements to assure that they adequately express their understanding of the transaction. The agent and brokerage are qualified to advise on real estate matters. **IF LEGAL OR TAX ADVICE IS DESIRED, YOU SHOULD CONSULT THE APPROPRIATE PROFESSIONAL.**

Consent: By signing on the reverse side, you acknowledge that you have read and understand this form and are giving your voluntary, informed consent to the agency relationship disclosed. If you do not agree to the agent(s) and/or brokerage acting as a dual agent, you are not required to consent to this agreement and you may either request a separate agent in the brokerage to be appointed to represent your interests or you may terminate your agency relationship and obtain representation from another brokerage.

Any questions regarding the role or responsibilities of the brokerage or its agents should be directed to:

Simple Steps To Protect Your Family From Lead Hazards

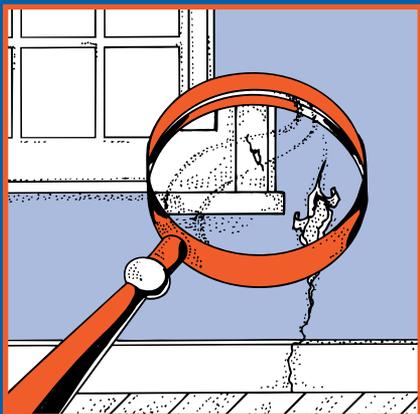

If you think your home has high levels of lead:

- ◆ Get your young children tested for lead, even if they seem healthy.
- ◆ Wash children's hands, bottles, pacifiers, and toys often.
- ◆ Make sure children eat healthy, low-fat foods.
- ◆ Get your home checked for lead hazards.
- ◆ Regularly clean floors, window sills, and other surfaces.
- ◆ Wipe soil off shoes before entering house.
- ◆ Talk to your landlord about fixing surfaces with peeling or chipping paint.
- ◆ Take precautions to avoid exposure to lead dust when remodeling or renovating (call 1-800-424-LEAD for guidelines).
- ◆ Don't use a belt-sander, propane torch, high temperature heat gun, scraper, or sandpaper on painted surfaces that may contain lead.
- ◆ Don't try to remove lead-based paint yourself.

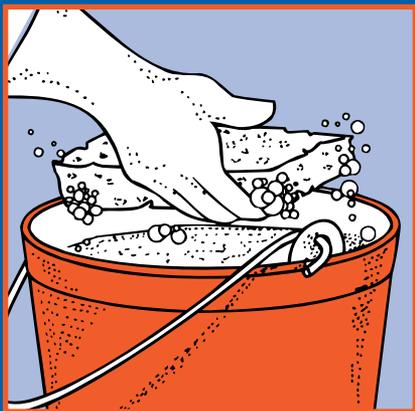

Recycled/Recyclable

Printed with vegetable oil based inks on recycled paper (minimum 50% postconsumer) process chlorine free.

Are You Planning To Buy, Rent, or Renovate a Home Built Before 1978?

Many houses and apartments built before 1978 have paint that contains high levels of lead (called lead-based paint). Lead from paint, chips, and dust can pose serious health hazards if not taken care of properly.

OWNERS, BUYERS, and RENTERS are encouraged to check for lead (see page 6) before renting, buying or renovating pre-1978 housing.

Federal law requires that individuals receive certain information before renting, buying, or renovating pre-1978 housing:

LANDLORDS have to disclose known information on lead-based paint and lead-based paint hazards before leases take effect. Leases must include a disclosure about lead-based paint.

SELLERS have to disclose known information on lead-based paint and lead-based paint hazards before selling a house. Sales contracts must include a disclosure about lead-based paint. Buyers have up to 10 days to check for lead.

RENOVATORS disturbing more than 2 square feet of painted surfaces have to give you this pamphlet before starting work.

IMPORTANT!

Lead From Paint, Dust, and Soil Can Be Dangerous If Not Managed Properly

- FACT:** Lead exposure can harm young children and babies even before they are born.
- FACT:** Even children who seem healthy can have high levels of lead in their bodies.
- FACT:** People can get lead in their bodies by breathing or swallowing lead dust, or by eating soil or paint chips containing lead.
- FACT:** People have many options for reducing lead hazards. In most cases, lead-based paint that is in good condition is not a hazard.
- FACT:** Removing lead-based paint improperly can increase the danger to your family.

If you think your home might have lead hazards, read this pamphlet to learn some simple steps to protect your family.

Lead Gets in the Body in Many Ways

Childhood lead poisoning remains a major environmental health problem in the U.S.

Even children who appear healthy can have dangerous levels of lead in their bodies.

People can get lead in their body if they:

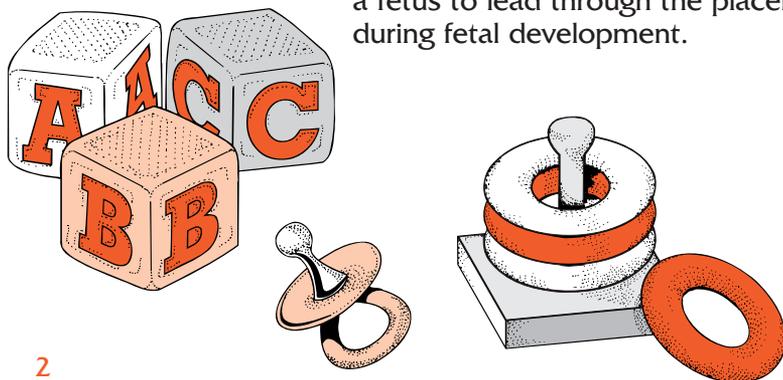

- ◆ Breathe in lead dust (especially during renovations that disturb painted surfaces).
- ◆ Put their hands or other objects covered with lead dust in their mouths.
- ◆ Eat paint chips or soil that contains lead.

Lead is even more dangerous to children under the age of 6:

- ◆ At this age children's brains and nervous systems are more sensitive to the damaging effects of lead.
- ◆ Children's growing bodies absorb more lead.
- ◆ Babies and young children often put their hands and other objects in their mouths. These objects can have lead dust on them.

Lead is also dangerous to women of childbearing age:

- ◆ Women with a high lead level in their system prior to pregnancy would expose a fetus to lead through the placenta during fetal development.

Lead's Effects

It is important to know that even exposure to low levels of lead can severely harm children.

In children, lead can cause:

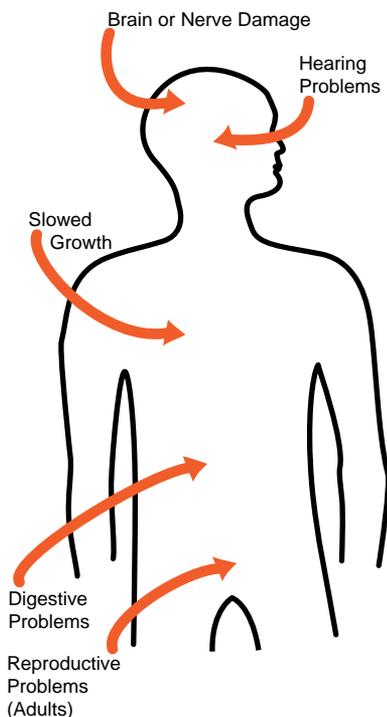

- ◆ Nervous system and kidney damage.
- ◆ Learning disabilities, attention deficit disorder, and decreased intelligence.
- ◆ Speech, language, and behavior problems.
- ◆ Poor muscle coordination.
- ◆ Decreased muscle and bone growth.
- ◆ Hearing damage.

While low-lead exposure is most common, exposure to high levels of lead can have devastating effects on children, including seizures, unconsciousness, and, in some cases, death.

Although children are especially susceptible to lead exposure, lead can be dangerous for adults too.

In adults, lead can cause:

- ◆ Increased chance of illness during pregnancy.
- ◆ Harm to a fetus, including brain damage or death.
- ◆ Fertility problems (in men and women).
- ◆ High blood pressure.
- ◆ Digestive problems.
- ◆ Nerve disorders.
- ◆ Memory and concentration problems.
- ◆ Muscle and joint pain.

**Lead affects
the body in
many ways.**

Where Lead-Based Paint Is Found

In general, the older your home, the more likely it has lead-based paint.

Many homes built before 1978 have lead-based paint. The federal government banned lead-based paint from housing in 1978. Some states stopped its use even earlier. Lead can be found:

- ◆ In homes in the city, country, or suburbs.
- ◆ In apartments, single-family homes, and both private and public housing.
- ◆ Inside and outside of the house.
- ◆ In soil around a home. (Soil can pick up lead from exterior paint or other sources such as past use of leaded gas in cars.)

Checking Your Family for Lead

Get your children and home tested if you think your home has high levels of lead.

To reduce your child's exposure to lead, get your child checked, have your home tested (especially if your home has paint in poor condition and was built before 1978), and fix any hazards you may have. Children's blood lead levels tend to increase rapidly from 6 to 12 months of age, and tend to peak at 18 to 24 months of age.

Consult your doctor for advice on testing your children. A simple blood test can detect high levels of lead. Blood tests are usually recommended for:

- ◆ Children at ages 1 and 2.
- ◆ Children or other family members who have been exposed to high levels of lead.
- ◆ Children who should be tested under your state or local health screening plan.

Your doctor can explain what the test results mean and if more testing will be needed.

Identifying Lead Hazards

Lead-based paint is usually not a hazard if it is in good condition, and it is not on an impact or friction surface, like a window. It is defined by the federal government as paint with lead levels greater than or equal to 1.0 milligram per square centimeter, or more than 0.5% by weight.

Deteriorating lead-based paint (peeling, chipping, chalking, cracking or damaged) is a hazard and needs immediate attention. It may also be a hazard when found on surfaces that children can chew or that get a lot of wear-and-tear, such as:

- ◆ Windows and window sills.
- ◆ Doors and door frames.
- ◆ Stairs, railings, banisters, and porches.

Lead dust can form when lead-based paint is scraped, sanded, or heated. Dust also forms when painted surfaces bump or rub together. Lead chips and dust can get on surfaces and objects that people touch. Settled lead dust can re-enter the air when people vacuum, sweep, or walk through it. The following two federal standards have been set for lead hazards in dust:

- ◆ 40 micrograms per square foot ($\mu\text{g}/\text{ft}^2$) and higher for floors, including carpeted floors.
- ◆ 250 $\mu\text{g}/\text{ft}^2$ and higher for interior window sills.

Lead in soil can be a hazard when children play in bare soil or when people bring soil into the house on their shoes. The following two federal standards have been set for lead hazards in residential soil:

- ◆ 400 parts per million (ppm) and higher in play areas of bare soil.
- ◆ 1,200 ppm (average) and higher in bare soil in the remainder of the yard.

The only way to find out if paint, dust and soil lead hazards exist is to test for them. The next page describes the most common methods used.

Lead from paint chips, which you can see, and lead dust, which you can't always see, can both be serious hazards.

Checking Your Home for Lead

Just knowing that a home has lead-based paint may not tell you if there is a hazard.

You can get your home tested for lead in several different ways:

- ◆ A paint **inspection** tells you whether your home has lead-based paint and where it is located. It won't tell you whether or not your home currently has lead hazards.
- ◆ A **risk assessment** tells you if your home currently has any lead hazards from lead in paint, dust, or soil. It also tells you what actions to take to address any hazards.
- ◆ A combination risk assessment and inspection tells you if your home has any lead hazards and if your home has any lead-based paint, and where the lead-based paint is located.

Hire a trained and certified testing professional who will use a range of reliable methods when testing your home.

- ◆ Visual inspection of paint condition and location.
- ◆ A portable x-ray fluorescence (XRF) machine.
- ◆ Lab tests of paint, dust, and soil samples.

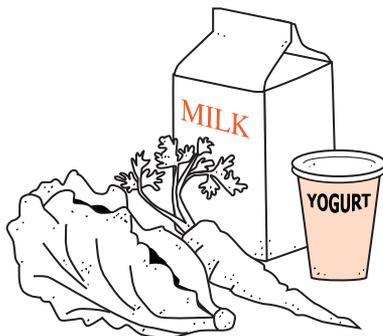

There are state and federal programs in place to ensure that testing is done safely, reliably, and effectively. Contact your state or local agency (see bottom of page 11) for more information, or call **1-800-424-LEAD (5323)** for a list of contacts in your area.

Home test kits for lead are available, but may not always be accurate. Consumers should not rely on these kits before doing renovations or to assure safety.

What You Can Do Now To Protect Your Family

If you suspect that your house has lead hazards, you can take some immediate steps to reduce your family's risk:

- ◆ If you rent, notify your landlord of peeling or chipping paint.
- ◆ Clean up paint chips immediately.
- ◆ Clean floors, window frames, window sills, and other surfaces weekly. Use a mop or sponge with warm water and a general all-purpose cleaner or a cleaner made specifically for lead. REMEMBER: NEVER MIX AMMONIA AND BLEACH PRODUCTS TOGETHER SINCE THEY CAN FORM A DANGEROUS GAS.
- ◆ Thoroughly rinse sponges and mop heads after cleaning dirty or dusty areas.
- ◆ Wash children's hands often, especially before they eat and before nap time and bed time.
- ◆ Keep play areas clean. Wash bottles, pacifiers, toys, and stuffed animals regularly.
- ◆ Keep children from chewing window sills or other painted surfaces.
- ◆ Clean or remove shoes before entering your home to avoid tracking in lead from soil.
- ◆ Make sure children eat nutritious, low-fat meals high in iron and calcium, such as spinach and dairy products. Children with good diets absorb less lead.

Reducing Lead Hazards In The Home

Removing lead improperly can increase the hazard to your family by spreading even more lead dust around the house.

Always use a professional who is trained to remove lead hazards safely.

In addition to day-to-day cleaning and good nutrition:

- ◆ You can **temporarily** reduce lead hazards by taking actions such as repairing damaged painted surfaces and planting grass to cover soil with high lead levels. These actions (called “interim controls”) are not permanent solutions and will need ongoing attention.
- ◆ To **permanently** remove lead hazards, you should hire a certified lead “abatement” contractor. Abatement (or permanent hazard elimination) methods include removing, sealing, or enclosing lead-based paint with special materials. Just painting over the hazard with regular paint is not permanent removal.

Always hire a person with special training for correcting lead problems—someone who knows how to do this work safely and has the proper equipment to clean up thoroughly. Certified contractors will employ qualified workers and follow strict safety rules as set by their state or by the federal government.

Once the work is completed, dust cleanup activities must be repeated until testing indicates that lead dust levels are below the following:

- ◆ 40 micrograms per square foot ($\mu\text{g}/\text{ft}^2$) for floors, including carpeted floors;
- ◆ 250 $\mu\text{g}/\text{ft}^2$ for interior windows sills; and
- ◆ 400 $\mu\text{g}/\text{ft}^2$ for window troughs.

Call your state or local agency (see bottom of page 11) for help in locating certified professionals in your area and to see if financial assistance is available.

Remodeling or Renovating a Home With Lead-Based Paint

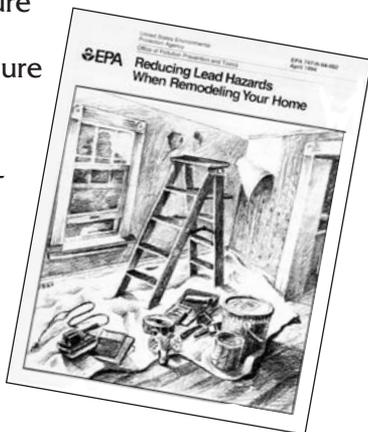

Take precautions before your contractor or you begin remodeling or renovating anything that disturbs painted surfaces (such as scraping off paint or tearing out walls):

- ◆ **Have the area tested for lead-based paint.**
- ◆ **Do not use a belt-sander, propane torch, high temperature heat gun, dry scraper, or dry sandpaper** to remove lead-based paint. These actions create large amounts of lead dust and fumes. Lead dust can remain in your home long after the work is done.
- ◆ **Temporarily move your family** (especially children and pregnant women) out of the apartment or house until the work is done and the area is properly cleaned. If you can't move your family, at least completely seal off the work area.
- ◆ **Follow other safety measures to reduce lead hazards.** You can find out about other safety measures by calling 1-800-424-LEAD. Ask for the brochure "Reducing Lead Hazards When Remodeling Your Home." This brochure explains what to do before, during, and after renovations.

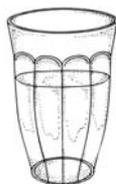

If you have already completed renovations or remodeling that could have released lead-based paint or dust, get your young children tested and follow the steps outlined on page 7 of this brochure.

If not conducted properly, certain types of renovations can release lead from paint and dust into the air.

Other Sources of Lead

While paint, dust, and soil are the most common sources of lead, other lead sources also exist.

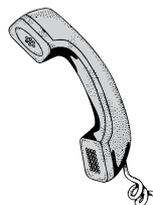

- ◆ **Drinking water.** Your home might have plumbing with lead or lead solder. Call your local health department or water supplier to find out about testing your water. You cannot see, smell, or taste lead, and boiling your water will not get rid of lead. If you think your plumbing might have lead in it:
 - Use only cold water for drinking and cooking.
 - Run water for 15 to 30 seconds before drinking it, especially if you have not used your water for a few hours.
- ◆ **The job.** If you work with lead, you could bring it home on your hands or clothes. Shower and change clothes before coming home. Launder your work clothes separately from the rest of your family's clothes.
- ◆ Old painted **toys** and **furniture**.
- ◆ Food and liquids stored in **lead crystal** or **lead-glazed pottery or porcelain**.
- ◆ **Lead smelters** or other industries that release lead into the air.
- ◆ **Hobbies** that use lead, such as making pottery or stained glass, or refinishing furniture.
- ◆ **Folk remedies** that contain lead, such as “greta” and “azarcon” used to treat an upset stomach.

For More Information

The National Lead Information Center

Call **1-800-424-LEAD (424-5323)** to learn how to protect children from lead poisoning and for other information on lead hazards. To access lead information via the web, visit **www.epa.gov/lead** and **www.hud.gov/offices/lead/**.

EPA's Safe Drinking Water Hotline

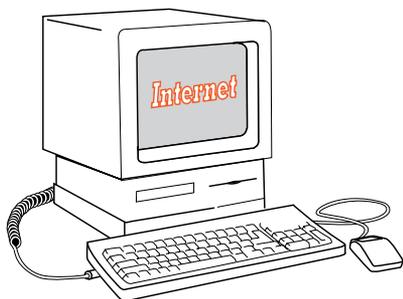

Call **1-800-426-4791** for information about lead in drinking water.

Consumer Product Safety Commission (CPSC) Hotline

To request information on lead in consumer products, or to report an unsafe consumer product or a product-related injury call **1-800-638-2772**, or visit CPSC's Web site at: **www.cpsc.gov**.

Health and Environmental Agencies

Some cities, states, and tribes have their own rules for lead-based paint activities. Check with your local agency to see which laws apply to you. Most agencies can also provide information on finding a lead abatement firm in your area, and on possible sources of financial aid for reducing lead hazards. Receive up-to-date address and phone information for your local contacts on the Internet at **www.epa.gov/lead** or contact the National Lead Information Center at **1-800-424-LEAD**.

For the hearing impaired, call the Federal Information Relay Service at **1-800-877-8339** to access any of the phone numbers in this brochure.

CONSUMER GUIDE TO AGENCY RELATIONSHIPS

Brick House Realty

We are pleased you have selected Brick House Realty to help you with your real estate needs. Whether you are selling, buying or leasing real estate, Brick House Realty can provide you with expertise and assistance. Because this may be the largest financial transaction you will enter into, it is important to understand the role of the agents and brokers with whom you are working. Below is some information that explains the various services agents can offer and the options for working with you.

For more information on agency law in Ohio you can also contact the Ohio Division of Real Estate & Professional Licensing at (614) 466-4100, or on their website www.com.state.oh.us.

Representing Sellers

Most sellers of real estate choose to list their home for sale with a real estate brokerage. When they do so, they sign a listing agreement that authorizes the brokerage and the listing agent to represent their interests. As the seller's agent, the brokerage and listing agent must: follow the seller's lawful instructions, be loyal to the seller, promote the seller's best interests, disclose material facts to the seller, maintain confidential information, act with reasonable skill and care and, account for any money they handle in the transaction. In rare circumstances, a listing broker may offer "subagency" to other brokerages which would also represent the seller's interests and owe the seller these same duties.

Representing Buyers

When purchasing real estate, buyers usually choose to work with a real estate agent as well. Often the buyers want to be represented in the transaction. This is referred to as buyer's agency. A brokerage and agent that agree to represent a buyer's interest in a transaction must: follow the buyer's lawful instructions, be loyal to the buyer, promote the buyer's best interests, disclose material facts to the buyer, maintain confidential information and account for any money they handle in the transaction.

Dual Agency

Occasionally the same agent and brokerage who represents the seller also represents the buyer. This is referred to as dual agency. When a brokerage and its agents become "dual agents," they must maintain a neutral position in the transaction. They may not advocate the position of one client over the best interests of the other client, or disclose any confidential information to the other party without written consent.

Representing Both the Buyer & Seller

On occasion, the buyer and seller will each be represented by two different agents from the same brokerage. In this case the agents may each represent the best interest of their respective clients. Or, depending on company policy, the agents may both act as dual agents and remain neutral in the transaction. When either of the above occurs, the brokerage will be considered a dual agent. As a dual agent the brokerage and its managers will maintain a neutral position and cannot advocate for the position of one client over another. The brokerage will also protect the confidential information of both parties.

Working With Brick House Realty

Brick House Realty does offer representation to both buyers and sellers. Therefore the potential exists for one agent to represent a buyer who wishes to purchase property listed with another agent in our company. If this occurs each agent will represent their own client, but Brick House Realty and its managers will act as a dual agent.

This means the brokerage and its managers will maintain a neutral position and not take any actions that will favor one side over the other. Brick House Realty will still supervise both agents to assure that their respective clients are being fully represented and will protect the parties' confidential information.

In the event that both the buyer and seller are represented by the same agent, that agent and Brick House Realty will act as dual agents but only if both parties agree. As dual agents they will treat both parties honestly, prepare and present offers at the direction of the parties, and help the parties fulfill the terms of any contract. They will not, however, disclose any confidential information that would place one party at an advantage over the other or advocate or negotiate to the detriment of either party.

If dual agency occurs you will be asked to consent to it in writing. If you do not agree to your agent acting as a dual agent, you can ask that another agent in our company be assigned to represent you or you can seek representation from another brokerage.

As a buyer, you may also choose to represent yourself on properties Brick House Realty has listed. In that instance Brick House Realty will represent the seller and you would represent your own best interests. Because the listing agent has a duty of full disclosure to the seller you should not share any information with the listing agent that you would not want the seller to know.

Working With Other Brokerages

When Brick House Realty lists property for sale it also cooperates with, and offers compensation to, other brokerages that represent buyers. Brick House Realty does reserve the right, in some instances, to vary the compensation it offers to other brokerages. As a seller, you should understand that just because Brick House Realty shares a fee with a brokerage representing the buyer, it does not mean that you will be represented by that brokerage. Instead that company will be looking out for the buyer and Brick House Realty will be representing your interests. When acting as a buyer's agent, Brick House Realty also accepts compensation offered by the listing broker. If the property is not listed with any broker, or the listing broker does not offer compensation, we will attempt to negotiate for a seller -paid fee.

Fair Housing Statement

It is illegal, pursuant to the Ohio Fair Housing Law, division (H) of Section 4112.02 of the Revised Code and the Federal Fair Housing Law, 42 U.S.C.A. 3601, as amended, to refuse to sell, transfer, assign, rent, lease, sublease or finance housing accommodations, refuse to negotiate for the sale or rental of housing accommodations, or otherwise deny or make unavailable housing accommodations because of race, color, religion, sex, familial status as defined in Section 4112.01 of the Revised Code, ancestry, military status as defined in that section, disability as defined in that section, or national origin or to so discriminate in advertising the sale or rental of housing, in the financing of housing, or in the provision of real estate brokerage services. It is also illegal, for profit, to induce or attempt to induce a person to sell or rent a dwelling by representations regarding the entry into the neighborhood of a person or persons belonging to one of the protected classes.

We hope you find this information to be helpful to you as you begin your real estate transaction. When you are ready to enter into a transaction, you will be given an Agency Disclosure Statement that specifically identifies the role of the agents and brokerages. Please ask questions if there is anything you do not understand.

Because it is important that you have this information, Ohio law requires that we ask you to sign below, acknowledging receipt of this Consumer Guide. Your signature will not obligate you to work with our company if you do not choose to do so.
